EXAMINATION REPORT - SEPARATE SHEET

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: WO 97 28126 A (AKAYAMA ATSUO ;KANDO YASUYUKI (JP); KIJI TOSHIYUKI (JP); NOGUCHI M) 7 August 1997 (1997-08-07)

1) The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1-16 does not involve an inventive step in the sense of Article 33(3) PCT:

The compounds of the present application represent a novel selection from the insecticidal compounds disclosed in claim 1 of D1. This selection can only be considered as inventive in case there is proof that the use of the compounds of the present application is associated with an unexpected effect. Since there is no proof for such an unexpected effect, the compounds of the present application and their use as pesticide cannot be considered as inventive.

2) The following points need attention for clarity reasons:

On page 7, lines 9-10 of the description it is stated that cycloalkyl groups are optionally substituted by halogen or alkyl. This should also be mentioned in the claims.

On page 7, lines 29-page 8, line 4 of the description it is stated that heterocyclyl groups may be substituted by several radicals. However the radicals mentioned here are not the same as the ones mentioned in the definitions of "heterocyclyl" in the claims. Therefore the definition of these radicals for "heterocyclyl" in the description should be deleted.
